Emil Karlsson

Frontend Engineer with experience building and maintaining production web applications using Next.js, React, TypeScript, and Firebase. Skilled in developing scalable frontend systems, REST API integrations, responsive interfaces, and modern deployment workflows using Vercel and GitHub. Experienced with AI-assisted development tools including Claude Code, Windsurf, and Codex to accelerate implementation and debugging. Strong focus on UX, performance, and maintainable frontend architecture.

Professional Experience

Frontend Developer / Technical SEO, IncRev, Jönköping

augusti 2024 - Nuvarande

- Built and maintained internal web applications and dashboard systems using Next.js, React, TypeScript, and Firebase
- Developed scalable frontend workflows including advanced filtering systems, export functionality, bulk operations, REST API integrations, and database-driven UI components
- Designed responsive frontend interfaces focused on usability, performance, scalability, and operational efficiency
- Managed production deployment workflows using GitHub and Vercel while improving frontend performance, technical SEO, and Core Web Vitals
- Collaborated across technical and commercial workflows to improve internal systems and digital operations

Education

New Media Design, Informatic, Jönköping University

augusti 2021 - maj 2024

Software Development and Mobile Platforms, Jönköping University

augusti 2019 - maj 2021

Projects

Internal Website & Metrics Management Platform

Built and maintained an internal dashboard platform for managing website data, pricing, metrics, filtering workflows, and bulk operations. Developed using Next.js, React, TypeScript, Firebase, and REST APIs.

Internal Dashboard Systems

Developed responsive frontend tools and workflow systems with advanced filtering, export functionality, API integrations, and scalable data handling focused on operational efficiency and UX.
